

HOLDING AN ONLINE MOVIE PARTY

The first step to hosting a meeting is to find a software that will work the best for you. There are extensions for Netflix, Hulu, Amazon Prime that allow you to have a "watch party". You can also use software like Zoom to watch a videos too (You need to make sure that the sound is coming from the internal computer and not through the speakers).

Next you are going to need to pick a movie. Choosing a movie that everyone is comfortable with is important. You can send out a form to see what people will like and choose based on votes. Make sure you chose a movie that is appropriate for the occasion.

Finally, kick back and enjoy the movie! Have some snacks and a cozy blanket for yourself. At the end you can thank everyone for coming and even have discussion after the movie about what everyone thought.
